

Participants for Study Needed

Are you eager to have opportunities for engagement during the COVID pandemic? We are currently recruiting research participants for a virtual research study. Our purpose is to improve a preference assessment for older adults through the use of supplemental pictures. We are seeking adults 65 years or older to offer their opinions on the pictures we have chosen for the preference assessment.

To Participate You Must:

- Live in a residential nursing facility (nursing unit, assisted living or independent living) **or** the community
- Be at least 65 years old
- Speak American English as your primary language
- Allow audio and video recording of the interview
- Have access to a computer and the internet

Time Requirements:

Participants will offer their opinion about pictures and complete a hearing, vision, cognitive and communication screening. The study will take about 2 hours over 1 session to 2 sessions.
